MD/PhD Interview Guide

General Tips

- **Smile and make eye contact.** Don't underestimate the power of positive body language! Maintain a positive attitude throughout the day.
- **Actively engage with interviewers and other interviewees.** Active engagement reflects your enthusiasm and desire to join the program.
- **Be prepared for certain questions but do not over-rehearse.** You want your responses to sound like normal conversation and not like a memorized script.
- **Be prepared to discuss your research.** Be able to answer questions and demonstrate your critical thinking ability. And potential for and interest in research.
- **Be able talk about any experience listed in your AMCAS application,** even if it occurred a number of years ago.
- **Anticipate questions** about things in your record that may concern the interviewer.
- **Be prepared to talk about an interviewer's research.** This is particularly important if you requested to meet with a specific person. It is important that you have some knowledge about the interviewer's current research interests, especially if you requested to meet with him/her. Do your homework.
- **Show motivation for dual degree.** Interviewers want to weed out those looking for a "Free MD".
- **Have questions of your own about the program.**
- **Engage in conversation with your fellow applicants** in between interviews and during the breaks. This will help reduce some of the interview day stress. Also, you can start to become acquainted with potential future classmates. Do they seem happy and positive about their experience in the Program?
