Jsamaan@aamc.org

Dear Dr. Samaan

The Executive Committee of the Society of Academic Urology has elected to follow the recommendations put forward by the Coalition for Physician Accountability Workgroup.

Part of the adopted measures is restricting in person visiting subinternships in Urology except for extenuating circumstances as outlined in the report. We understand that VSAS is scheduled to reopen next week and that some students may have previously registered for an in person visiting subinternship rotation. We would appreciate help in messaging that in person visiting subinternships are not being sanctioned by our organization this year and that, where feasible, these are being converted to virtual sub internships. Each Urology program will be encouraged to develop and provided with tools to create a virtual subinternship learning experience. Students need to understand that each medical school has to approve such virtual programs.

We appreciate your help in providing this messaging.

Sincerely

Kirsten Greene, M.D.

Secretary, Society of Academic Urology on behalf of the Board.
